

The FinanceGPT Labs AI Relay

13 Days. 6 Disciplines. One Complete AI Strategy.

The Executive Summary

FinanceGPT Labs is opening its internal playbook. For the next 13 business days (Jan 14 – Jan 30), we are running a high-intensity **AI Relay**.

This is not a standard webinar series. It is a recurring daily loop of 5 technical and strategic sprints designed to take you from "Zero" to "AI Architect." Whether you need to fix your data pipeline at 11:00 AM or design a Large Quantitative Model (LQM) at 3:00 PM, the relay is always running.

Dates: Wednesday, Jan 14, 2026 – Friday, Jan 30, 2026

Format: Live, Daily Recurring Sessions (Join the track that fits your role)

Platform: FinanceGPT Labs Digital Academy

The Daily Relay Schedule (SAST)

The relay repeats every weekday. Jump in for one specific skill or stay for the full stack.

Time	Track Focus	Who Should Attend
09:00	Strategy & Future-Proofing Navigating the AI shift, risk mitigation, and corporate survival.	CFOs, Executives, Strategists
11:00	Data Acquisition & Engineering Building the pipeline: Sourcing, cleaning, and compliance.	Data Leads, Ops Managers
13:00	LLM Wrapper Design Rapid prototyping and prompt engineering for immediate value.	Product Owners, Indie Hackers
15:00	Model Design & Development Architecture, Fine-tuning, and RAG implementation.	CTOs, Architects, Engineers
17:00	Deployment: Apps & Digital Twins	Full-Stack Devs, Innovation Leads

	Building AI-native apps and simulating reality.	
--	--	--

The Curriculum: 6 Core Pillars

1. **Corporate Strategy:** Moving beyond the hype. We break down exactly how to align your workforce and business model with the 2026 AI landscape.
2. **Data Engineering:** Your model is only as good as your data. Learn the FinanceGPT Labs standard for clean, compliant data ingestion.
3. **Wrapper Engineering:** Stop over-building. Learn how to wrap Foundation Models with specific logic to solve 90% of business problems fast.
4. **Custom Model Design:** When APIs aren't enough. A deep dive into designing proprietary architectures and Large Quantitative Models.
5. **Application Development:** Integrating stochastic AI into deterministic web/mobile apps without breaking the user experience.
6. **Digital Twins:** The ultimate output. How to use AI to create digital replicas of physical assets for simulation and optimization.

Pricing & Access

- **Single Sprint Pass: \$60.00**
 - Includes access to one specific session topic (e.g., Data) on any date.
- **The Labs All-Access Bundle: \$250.00**
 - Includes access to ALL 6 tracks, every day, plus lifetime recordings and certification.

Why FinanceGPT Labs?

We don't just teach AI; we build the financial infrastructure of the future. This relay is a direct transfer of the skills, strategies, and code patterns we use daily to build the FinanceGPT platform.
